LAY, SET HATCH

With Easter on the way, our pheasant hens are laying well and in prime condition. At 55% lay, the egg quality is looking extremely good and we're on set for a successful hatch season.

REARING TO GO

Whilst challenging, the pandemic has allowed us time to assess our business and expand our facilities, we're currently improving our temperature controlled and high quality rearing unit.

PHEASANT POULTS APLENTY

Perfect eggs make for pristine pheasant poults. We're looking forward to rearing our high quality and healthy flocks of Polish Ring Necks and Polish Crosses in 2021.

TAKING ORDERS FOR DELIVERY NOW

The first hatch is expected on 26th April. Thousands of day-old pheasant and partridge chicks are available to order and will be delivered in our temp-controlled vehicles to ensure a comfortable journey.
